

New horizons

THE HEIGHT OF EXCELLENCE. THE ULTIMATE TRAVELLING COMPANION.

The fabulous Honda Gold Wing is simply the most advanced and full-featured touring motorcycle on the planet. It's no surprise that it's known globally as the 'king of the road'.

Ample long-haul pulling power is produced by its quick-starting 4-stroke, fuel-injected flat-6 engine. Its power delivery is strong and dependable, with effortless, breathtaking hill-climbing torque. It's also smooth and quiet, thanks to the maintenance-free shaft system, allowing you and your passenger to relax behind the broad, wind-deflecting fairing and adjustable windscreen, and listen to the bike's integrated premium audio system as you enjoy the scenery rolling past.

With its low centre of gravity, lightweight aluminium frame and aerodynamic styling, the Gold Wing is exceptionally agile, handling open motorways and congested cities with equal elegance and confidence. Its dual Combined Antilock Brake System ensures that stopping is always balanced and assured. Road surfaces are smoothed out by its plushly compliant suspension systems, including a cast aluminium Pro Arm swingarm and computer-controlled but rider-adjustable Pro-Link damper at the rear. Other hi-tech and carefully evolved performance features include an advanced low-emissions system, push-button electric reverse and cruise control.

- 5

1. ENGINE – The Honda-unique 1,832cc flat-six engine provides smooth, strong and easily managed power.

2. EXHAUST – Honda's HECS3 oxygen-sensing catalytic converter system ensures full EURO-3 compliance.

3. TRANSMISSION – Smooth-shifting close-ratio 6-speed transmission delivers a sure and seamless build of power.

4. FRONT FORK – A sturdy 45mm cartridge-type front fork with hydraulic anti-dive system gives a smooth ride and enhanced control.

5. SATELLITE NAVIGATION – The easily readable colour screen includes day and night-time visibility settings.

Unforgettable experiences

LUXURIOUS COMFORT AND CONVENIENCE. IMMENSE POWER AND PRESENCE.

Whatever the season and weather conditions, the Gold Wing creates luxurious surroundings for you and your passenger. Its standard cold weather Comfort Package creates new touring possibilities with adjustable heated handlebar grips, individually heated seats and backrests, and warm air vents for your feet.

On hot summer days a wind tunnel-tested flow-through ventilation system draws engine heat away from the rider for greatly enhanced riding comfort. Astride the low, ergonomically designed seat, you can plan and monitor your trip with the aid of a large, user-friendly multi-function LCD information centre.

Travelling on the Gold Wing is travelling in style. If the exceptional 147-litre luggage capacity of its integrated panniers and rear trunk is not enough, it can be extended with a range of accessories specially designed for your bike and your individual journey. A wide selection of decorative accessories will protect its gleaming paintwork and accentuate its impressive chrome features. Wherever you ride, be prepared for endless admiring attention... this also comes as standard!
